Postdoctoral Fellow Opening in Clinical Psychophysiology

The Clinical Psychophysiology Lab (cpl.psy.msu.edu) in the Department of Psychology at Michigan State University (MSU) seeks a research associate (i.e., postdoctoral fellow) in clinical psychophysiology focused on multi-method approaches – including behavior, EEG/ERP, fMRI, and peripheral physiology (e.g., startle eyeblink, heart rate, skin conductance) – to cognitive and affective mechanisms in anxiety and related psychopathology. The position will center on two NIH-funded studies that examine associations between anxiety-related problems and cognitive-control, reward, and threat processing across the menstrual cycle and development. Research associates are also encouraged to participate in and develop related projects in line with these themes.

We are seeking candidates with a doctoral degree in clinical or cognitive psychology, or neuroscience. Successful applicants will have substantive interests in anxiety research, and a goal of developing expertise in EEG/ERP and psychophysiology. Experience in cognitive neuroscience methods, EEG/ERP neuroimaging approaches, and related data analysis platforms are desirable. Strong computer programming skills are also desirable (e.g. EPrime, Matlab, etc.). The position offers excellent training in EEG/ERP neuroimaging methods, including advanced signal processing techniques such as phase-synchrony and bivariate and multivariate functional connectivity approaches. The trainee will be supervised by Dr. Jason Moser (MSU Department of Psychology; Clinical Psychology, Cognition and Cognitive Neuroscience, and Neuroscience programs).

Qualified individuals must have completed a Ph.D. in clinical or cognitive psychology or neuroscience and must be a U.S. citizen or have permanent resident status.

Applications will be reviewed starting immediately and continue until the position is filled. Candidates must complete an online application at www.careers.msu.edu (enter posting #465742 in the search box), which includes:

1. Cover letter explaining professional developmental goals and research focus
2. CV
3. Names and email addresses of three references

MSU is an affirmative-action, equal-opportunity employer and is committed to achieving excellence through cultural diversity. The university actively encourages applications and/or nominations of women, persons of color, veterans, and persons with disabilities.
